Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: The instant application is in condition for allowance, because the cited prior art fails to disclose a process for hydrogen activation of passivated iron catalyst having an iron precursor comprising metallic iron and activating the catalyst precursor in the presence of a nitrile at from 20 to 180°C.

Huser et al. discloses the preparation of transition metal/phosphine catalysts by hydrogen reduction (see abstract). The preferred transition metal catalyst includes iron (col. 4, lines 16-19). Huser et al. continues to disclose wherein the spent catalyst is regenerated (activated), with a adiponitrile (an aliphatic nitrile) and reduction (col. 5, line 49 – col. 6, line 4) with hydrogen gas carried out at a hydrogen pressure, measured at 25°C of from 1 to 200 bar (.1 to 20 Mpa) and at a temperature of from 5°C to 200°C (col. 4, lines 65-67). However, Huser et al. is directed towards regenerating a metal complex compound and not directed towards activating a catalyst precursor in the presence of a nitrile.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonas N. Strickland whose telephone number is 571-272-1359. The examiner can normally be reached on M-TH, 7:30-5:00, off 1st Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
